1. Use Case 1 - *<<UC03 Appointment Scheduler>>*

Test Case ID	**TC01 -**
Test Objective	**The user is rerouted to the home page after logging in.**
Preconditions	The user has navigated to the login page
Test steps	1. Enter valid or invalid email or lack thereof 2. Enter the password or lack thereof 3. Click login button
Input Values	1. Valid email and password 2. Invalid email and filled in password 3. Valid email but password is left blank 4. Invalid email but password is left blank. 5. The email is left blank and the password is filled in. 6. Both fields are left blank.
Expected results	The user is redirected to the home page unless they enter invalid credentials. Invalid credentials include an improperly formatted email or leaving the username/password empty

Test Case ID	**TC02 -**
Test Objective	**The user is rerouted to the available therapists after the appointments page**
Preconditions	The user has successfully logged into the site
Test steps	1. Click the select therapist button or do not
Input Values	Button clicked
Expected results	The user is redirected to the available therapists page. Invalid options would to not press the button.

Test Case ID	TC03 -
Test Objective	**The user will choose a therapist and be rerouted to the calendar page of days with available appointments.**
Preconditions	The user has logged in and clicked "Select Therapist"
Test steps	1. Click on one of the therapists. 2. Click the submit button.
Input Values	1. A therapist has been chosen and submit button has been clicked 2. A therapist has *not* been chosen and submit button has been clicked 3. Nothing is chosen/clicked.
Expected results	When the "Submit" button is pressed, the user will be redirected to the calendar page, where they can view available days. If a user tries to click submit without choosing a therapist, an error message will pop up.

Test Case ID	TC04 -
Test Objective	**The user can reschedule or cancel an existing appointment.**
Preconditions	The user is on the appointment scheduler (interactive calendar) page with at least one scheduled appointment.
Test steps	1. The user selects a day with button "Therapy Appointment Scheduled at xx:xx" 2. The user is prompted to either reschedule or cancel the appointment.
Input Values	1. 1 or 2 button (placeholder) to reschedule or cancel, respectively.
Expected results	1. If rescheduling, we go back to the available appointment times page. 2. If canceling, the existing appointment is removed from the calendar.
